

ECAADE 23 WORKSHOP 'DIRTY PRINTING LAB VOL.4'

18. & 19.09.2023 MediaLab IAM

.Workshop eCAADe 2023

EXPERIENCE ADDITIVE MANUFACTURING OF CLAY

^(en) The workshop „DIRTY PRINTING LAB vol4“ at the Institute of Architecture and Media offers participants the opportunity to collaboratively design experimental and innovative modular systems using 3D-printed ceramic elements and implement them as 1:1 prototypes.

Within the workshop, participants have the possibility to develop experimental designs for ceramic structural or facade systems by applying parametric design tools and additive manufacturing processes, taking into account material-specific properties.

1:1 prototypes of these modules are created by the participants during the workshop using a 3D printer specifically designed for viscous materials. Basic knowledge of Rhino 3D is desirable.
